Novel User Interfaces for Audio

Förn Louisedeh www.17h.en

Hochschule Bremen [University of Applied Sciences] Bremen, Germany

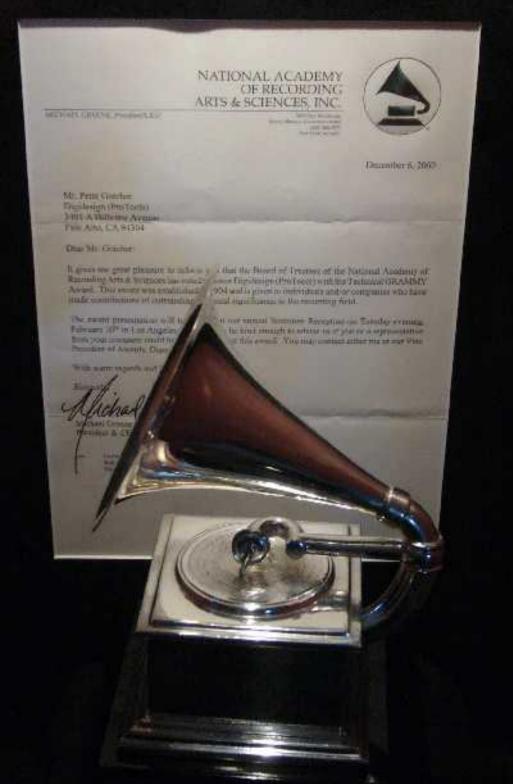

GRammy?

Interfaces for audio have a huge burden of tradition.

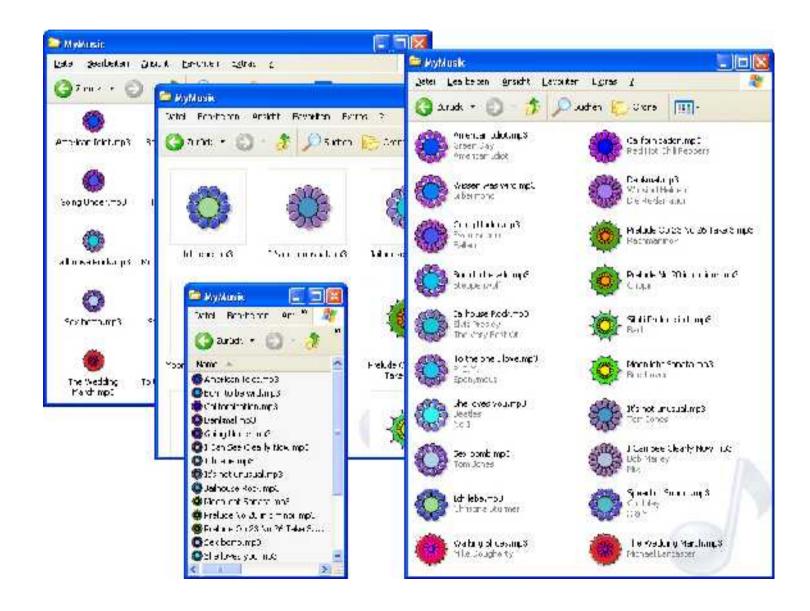

Can we use computers to do better?

Agenda

- * Music Teons
- × Mood and Music
- × Subjective Eq
- × Rhythmic Eq
- * Electrotactile Fader
- × Angoing Work
- × Conclusion

Demo

Learning and retrieval

Training

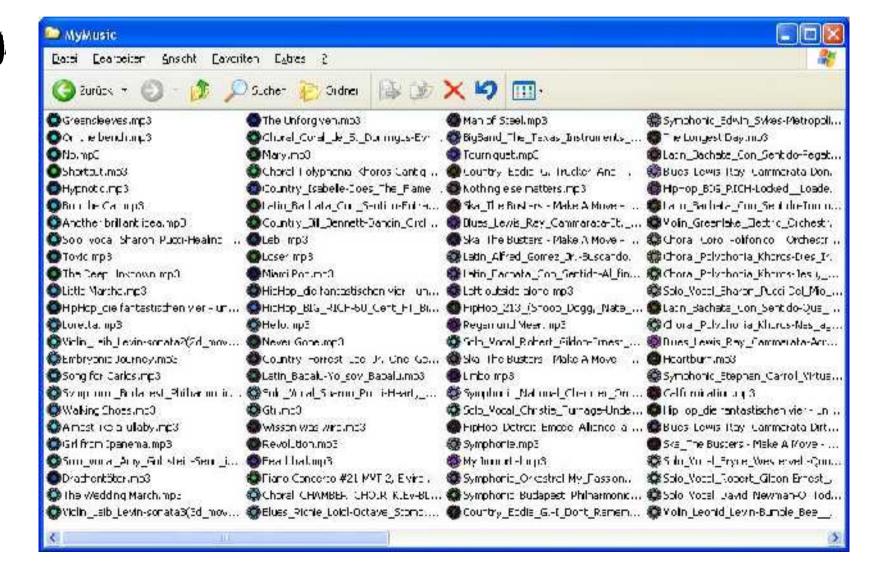

Neural Net

Retrieval

Sorting

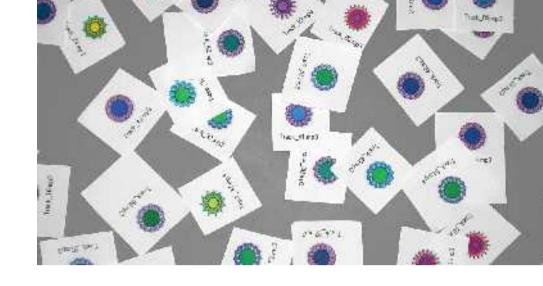

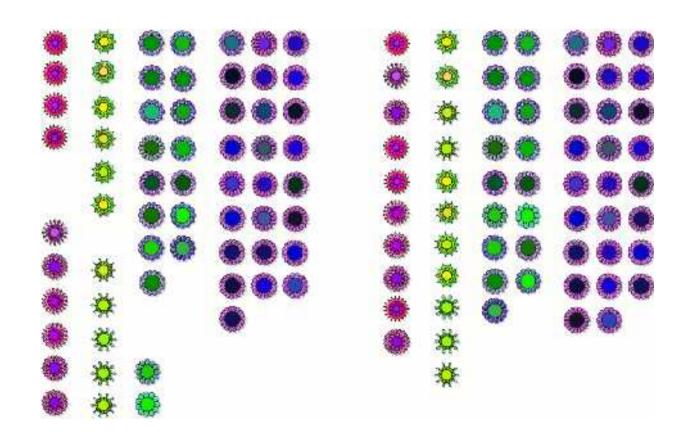

Sorting (Nothing else matters Metallica Black Album

Mobile

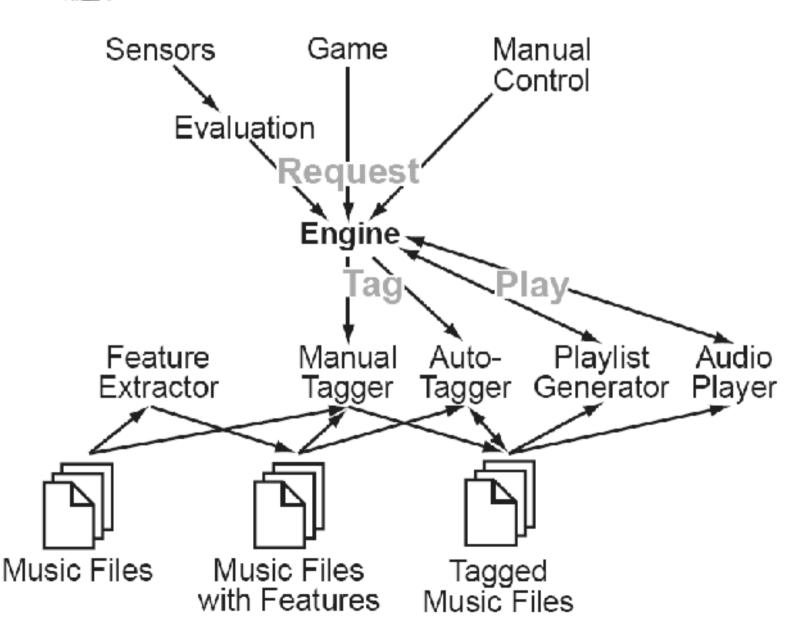

User Testing

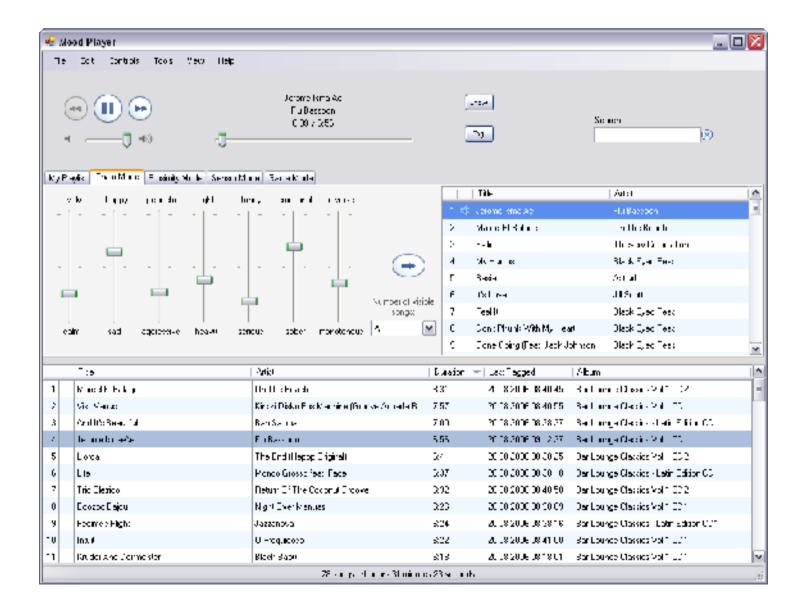

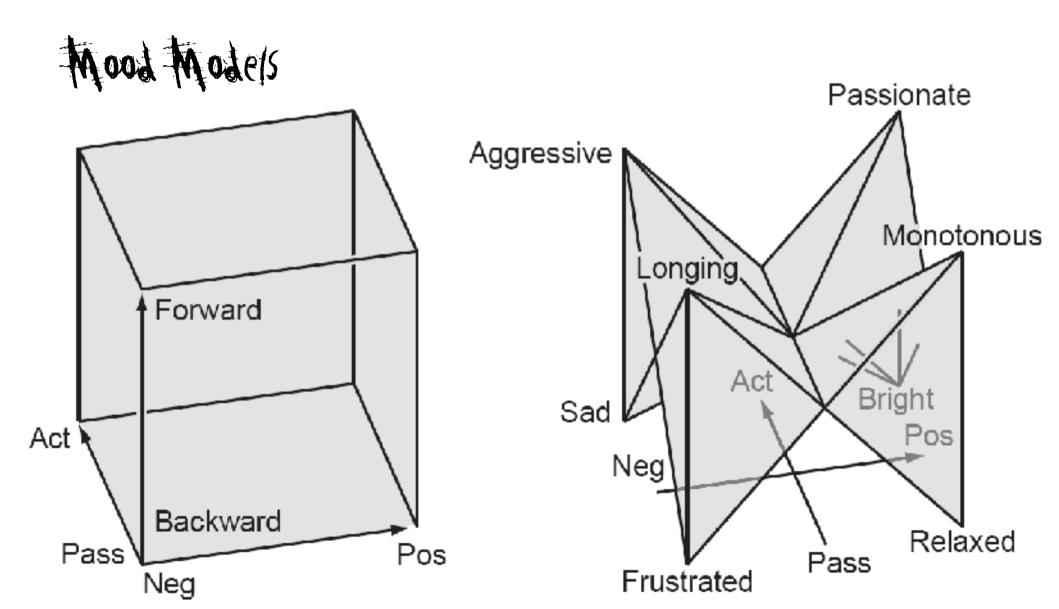

create an end-to-end system, comparable to color management

Player

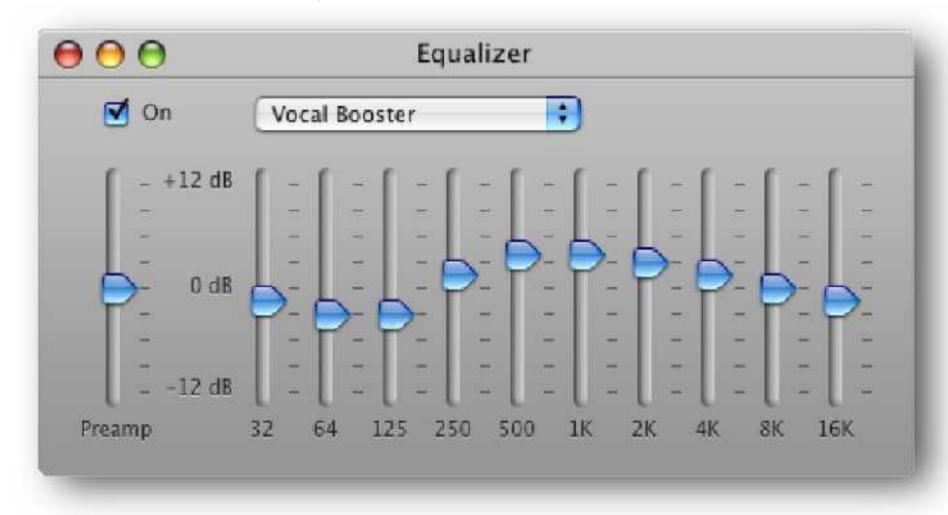

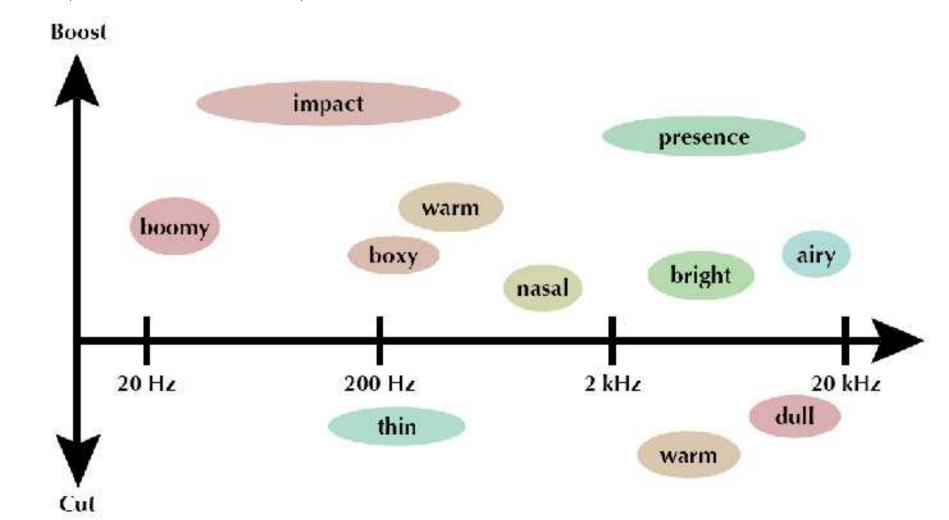

Subjective EQ

Old-school graphic equalizer: hard to control

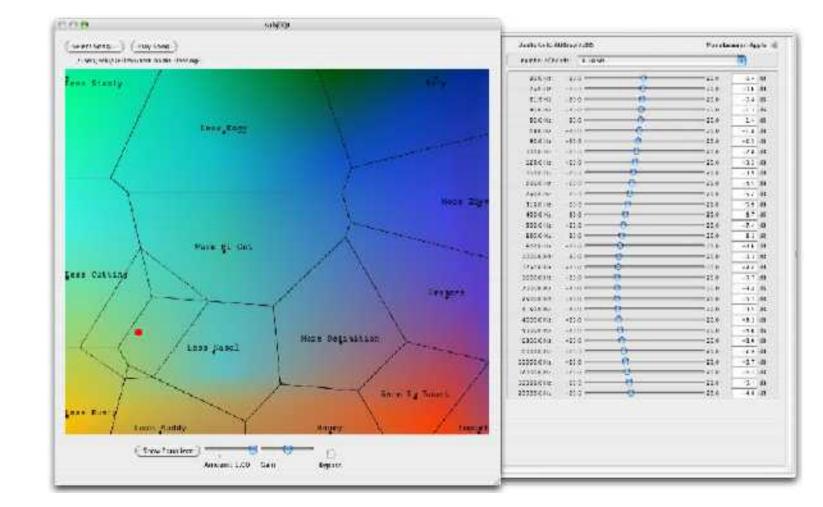

Subjective EQ

Sound pros use descriptive terms

Subjective EQ

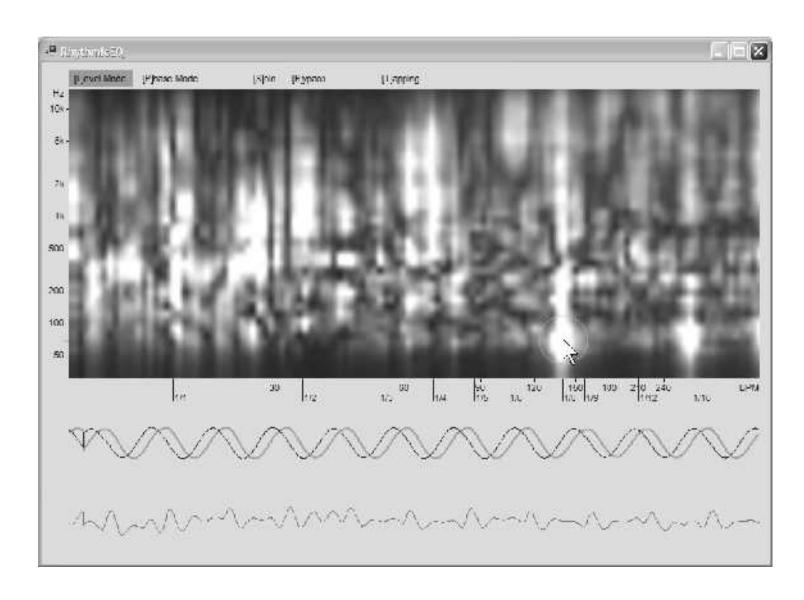

Arrange those terms by similarity of curves. Blen a.

One point controls the EQ.

Rhythmic EQ

Architecture

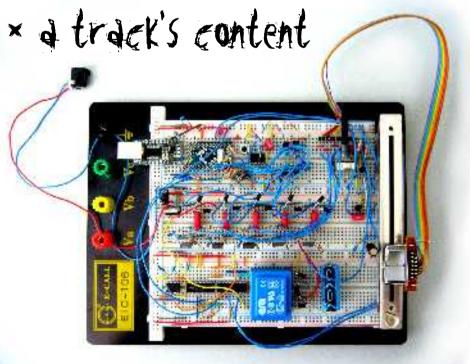

User Interface 40 x 120 Level Rhythmic **Beat Spectrum** and Phase Adjustments **Filters** Control Processor 40 Units Analysis Data Control Data Left Input Left Output Audio Path Right Output Right Input

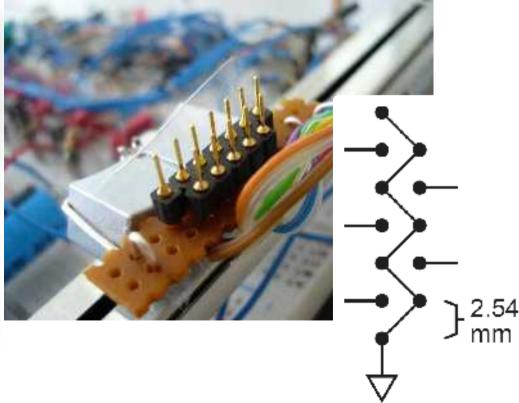

40 Audio Filters

Electrotactile Fader

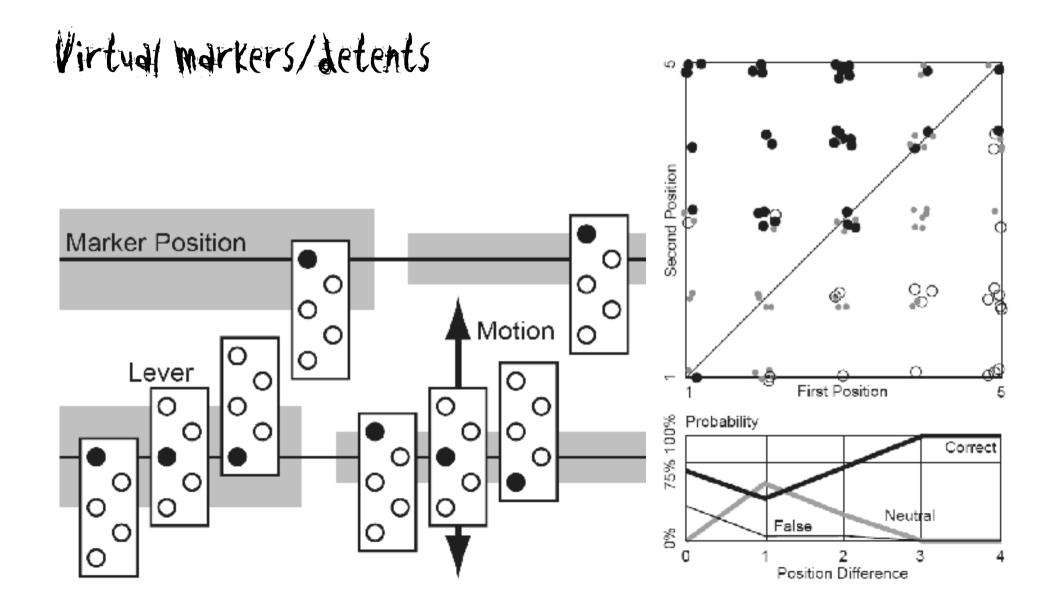

Short high-voltage pulses to

* communicate virtual detents/markers or

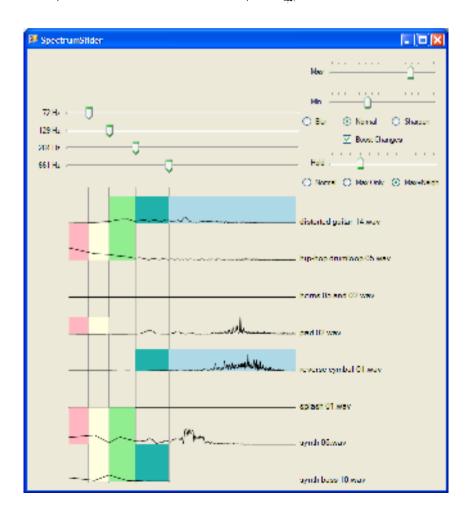

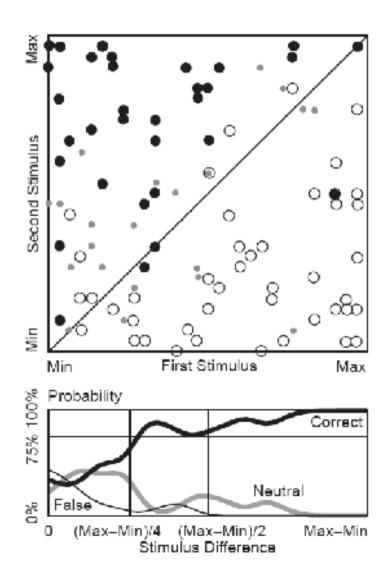

Electrotactile Fader

Electrotactile Fader

Spectrum Display [Demo]

Ongoing Work

Live performace control

- × Upcoming master's project: interfaces for musical instruments.
 - What's different in terms of HCT?
 - E.g.: A piano has no key named Undo
- × Video performances to accompany live music

Live Video Performance

From scribble to software

Demo

Conclusion

* Music and audio offer much unchartered terrain for new ideas in HCT.

* Try to learn something general about MCI

from music and audio
