HOCHSCHULE BREMEN
UNIVERSITY OF APPLIED SCIENCES

~~Grand Unified Theories~~

**Let's see
some real-life
examples!**

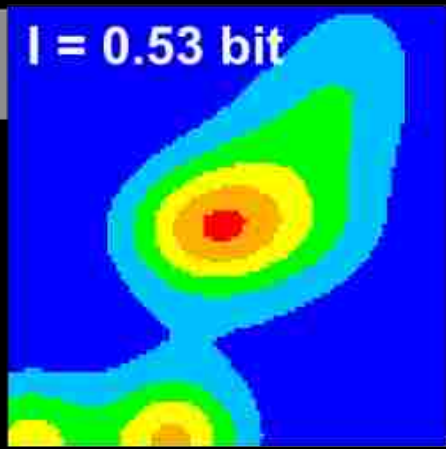

- **Sound Creation**
- **Audio Processing**
- **Content Management**

Sound Creation

Programming a Music Synthesizer through Data Mining

Parameter Change
from Statistics or
Additional UI

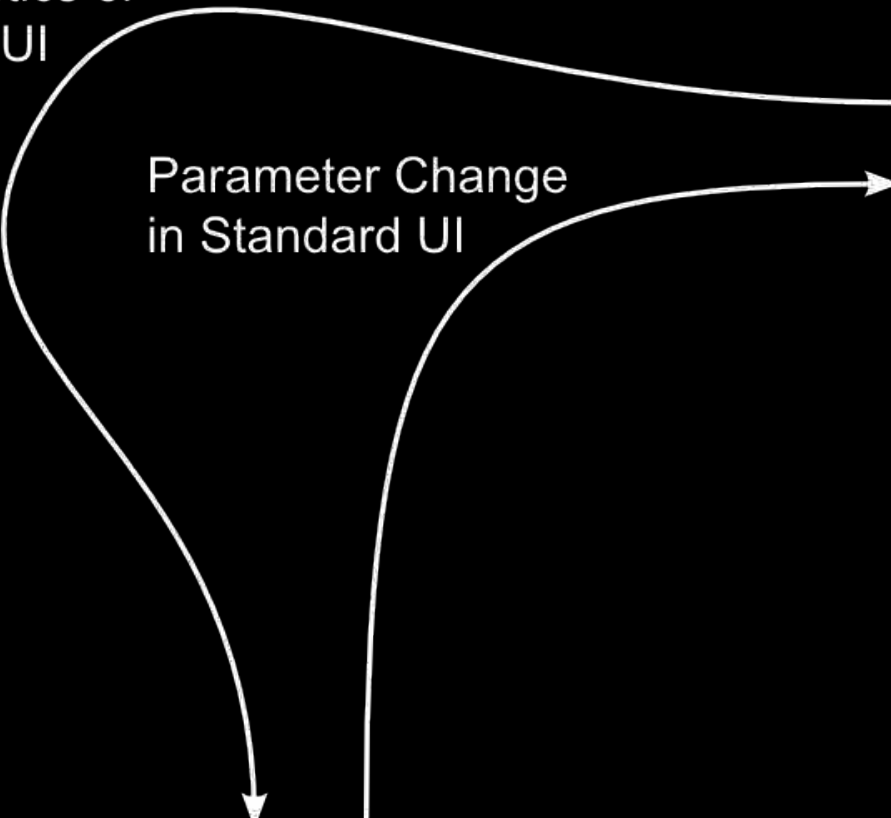

Parameter Change
in Standard UI

Audio Output

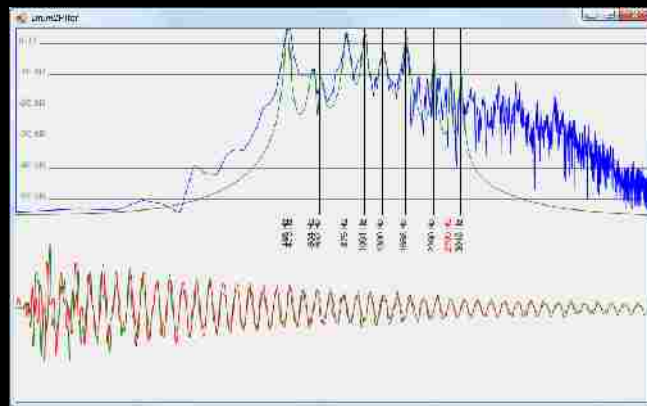

MIDI Input

A Versatile Expressive Percussion Instrument with Game Technology

with Sebastian Heise

A Malleable Drum

with Christoph von Tycowicz

Real-Time Audio Output

**Drum Strokes (incl. Position),
Damping, Pressure**

Drum Shape

Audio Processing

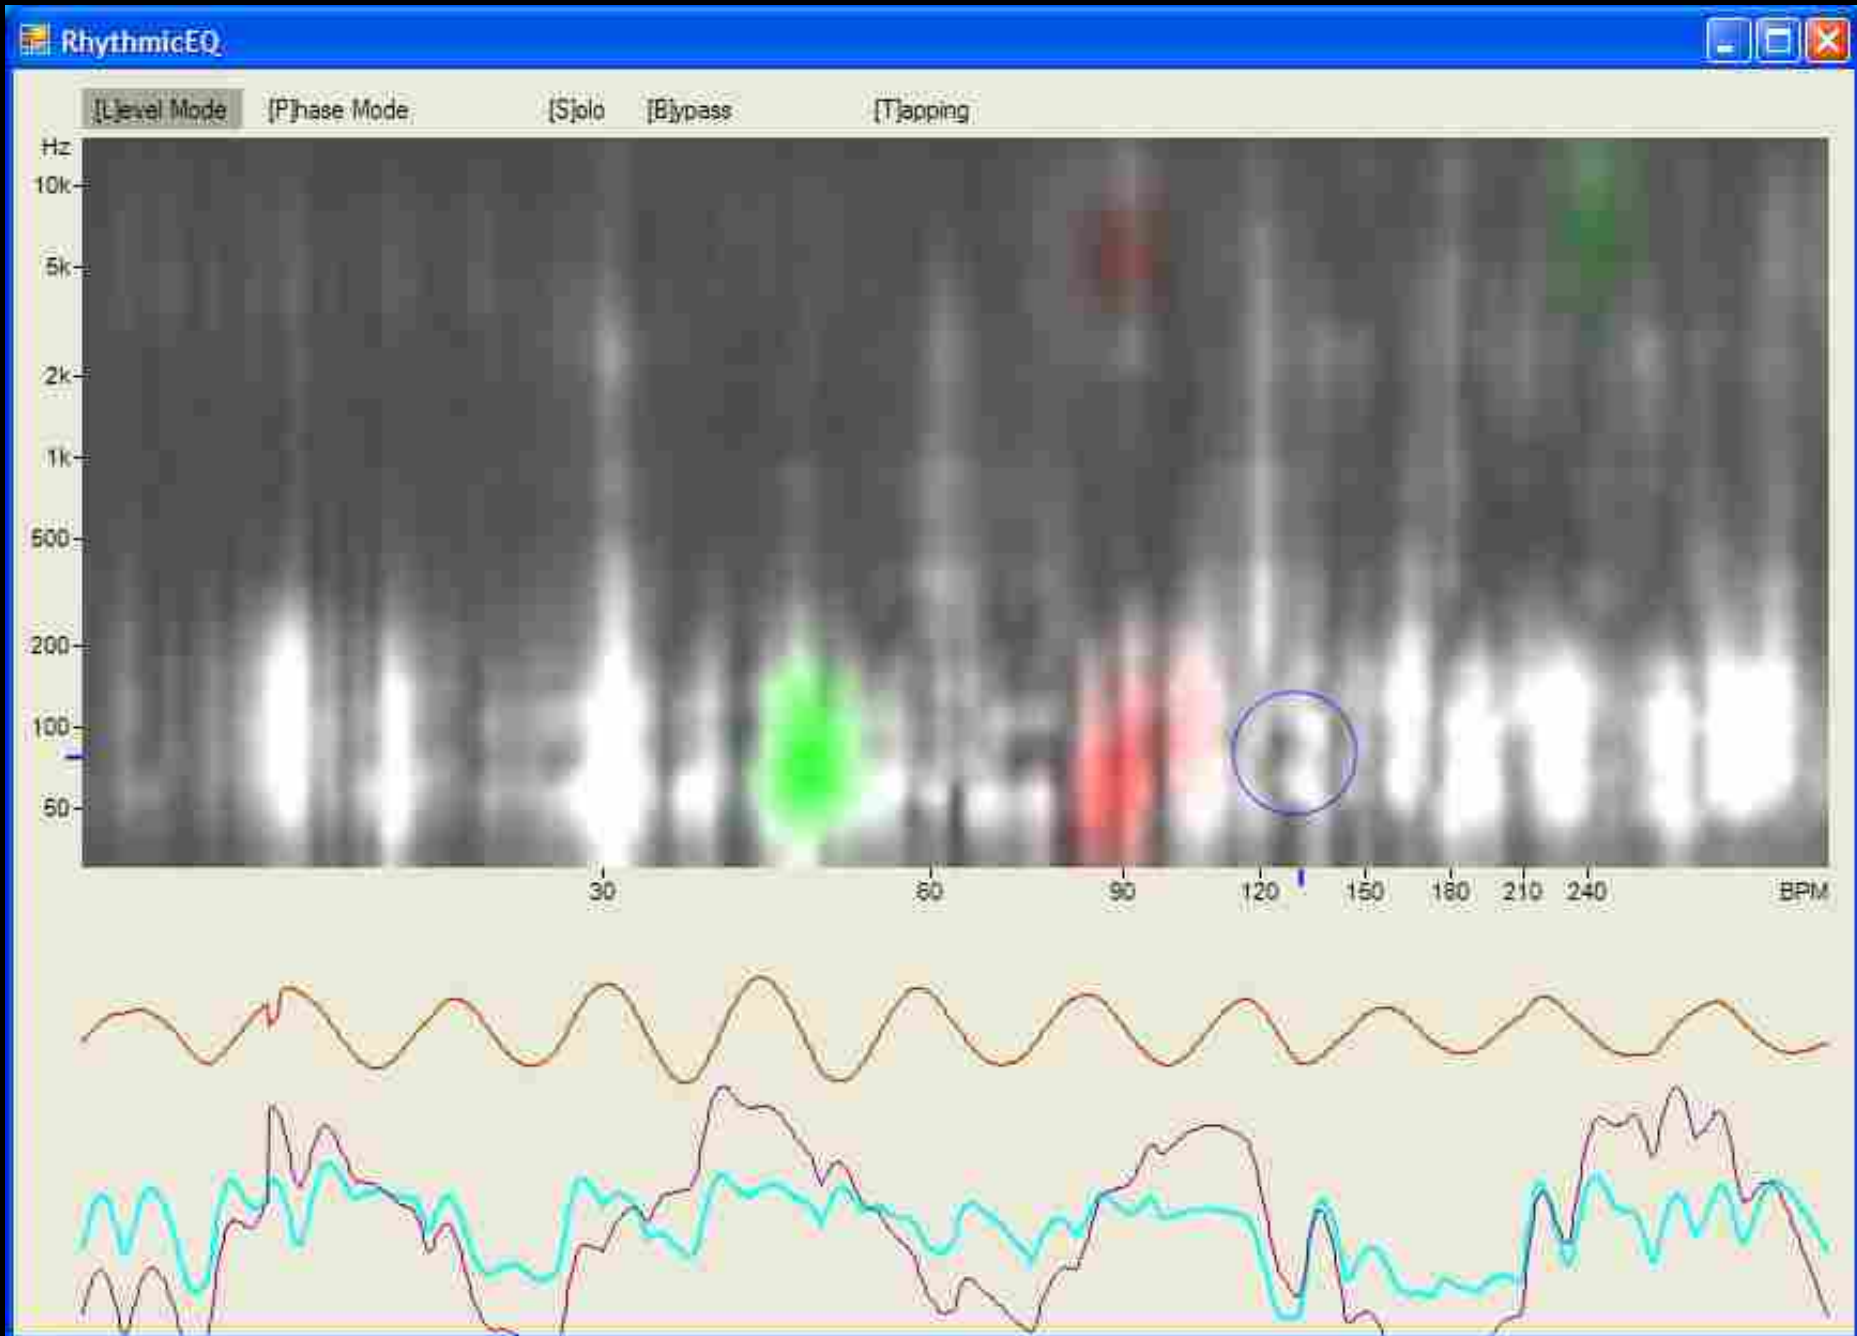

subjEQt:

Controlling an Equalizer through Subjective Terms

with Sebastian Mecklenburg

A Rhythmic Analyzer and Equalizer

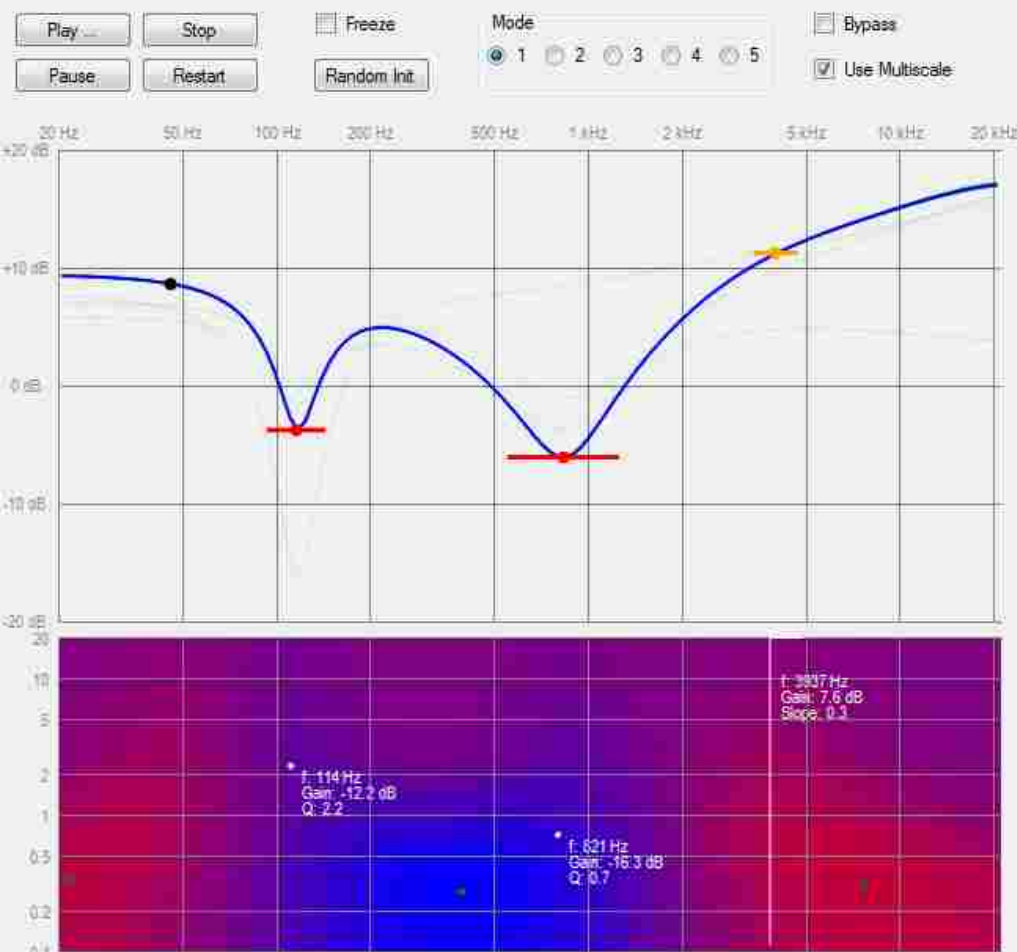

Rhythmic Frequency (Beats per Minute)

Audio Frequency (Hz)

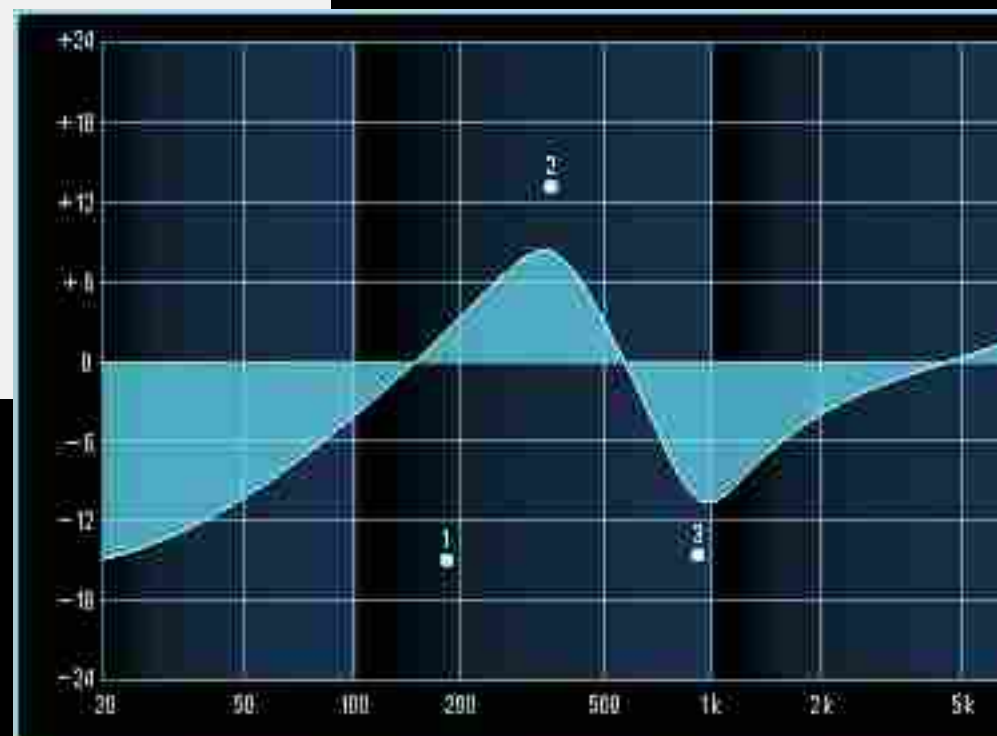

Graphical Control of a Parametric Equalizer

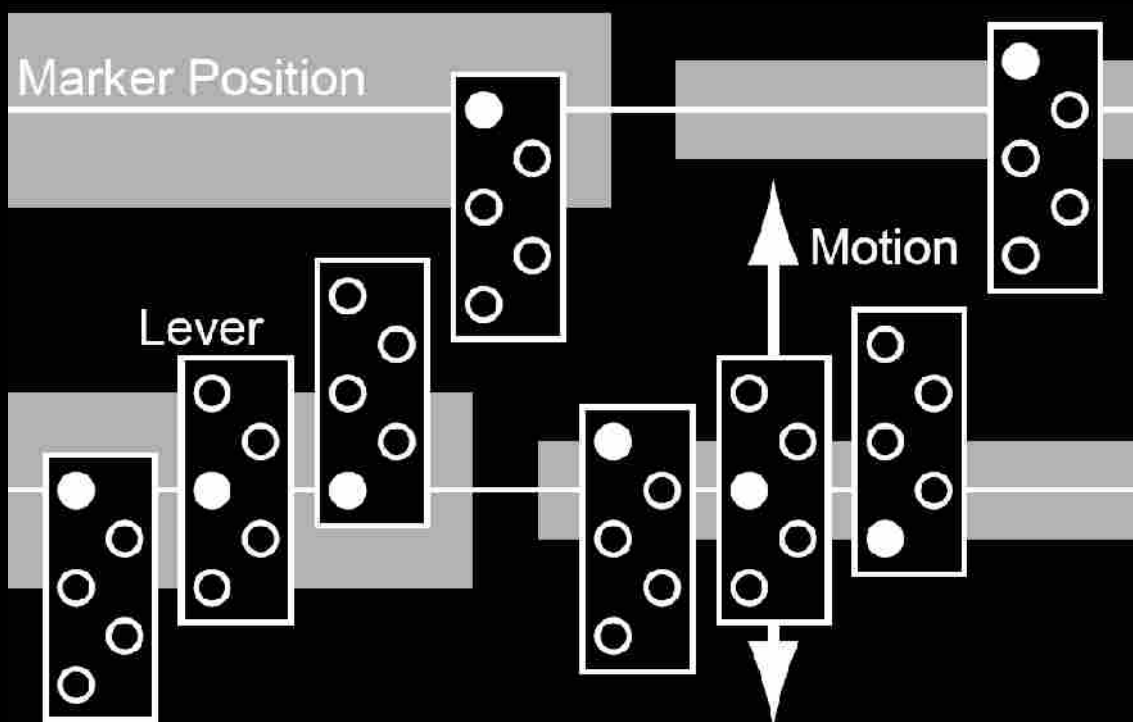

**New Interface:
On-curve Controls**

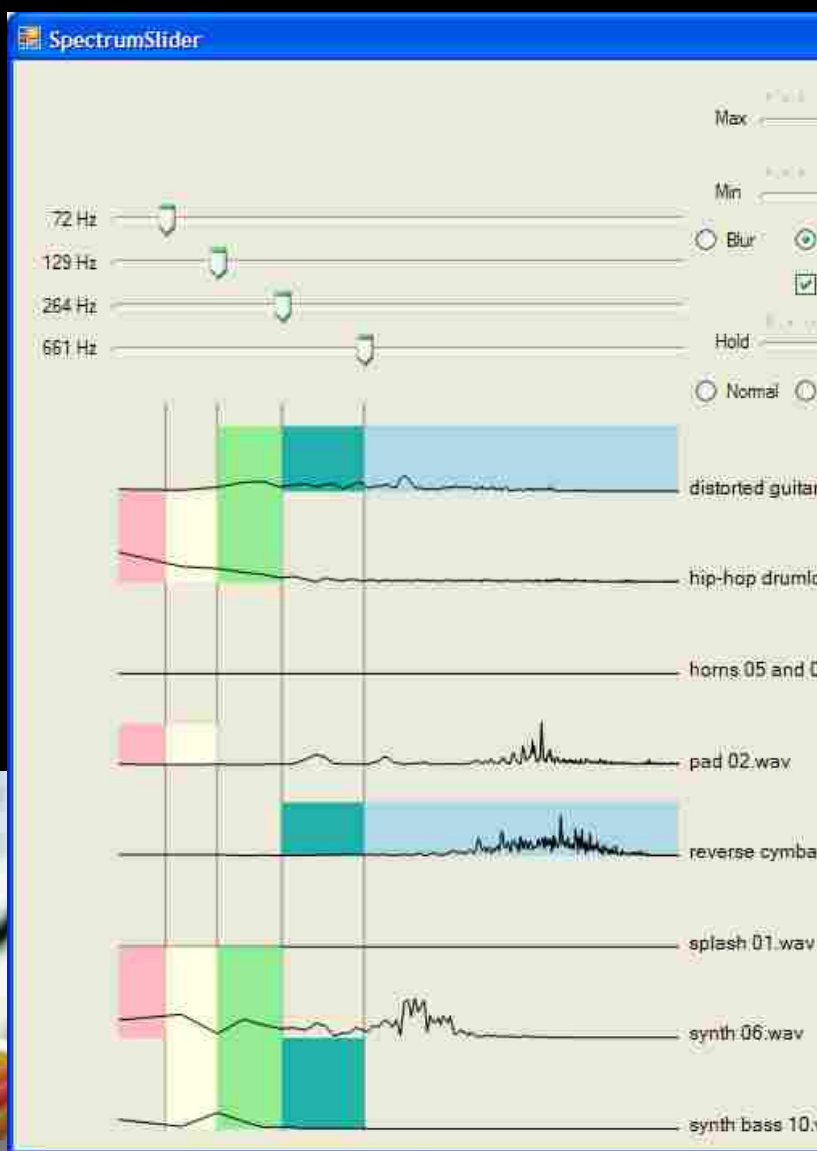

**Standard Controls:
Off-curve
(Steinberg Cubase)**

Sound at Your Fingertips: An Electrotactile Fader

**Virtual
Detents**

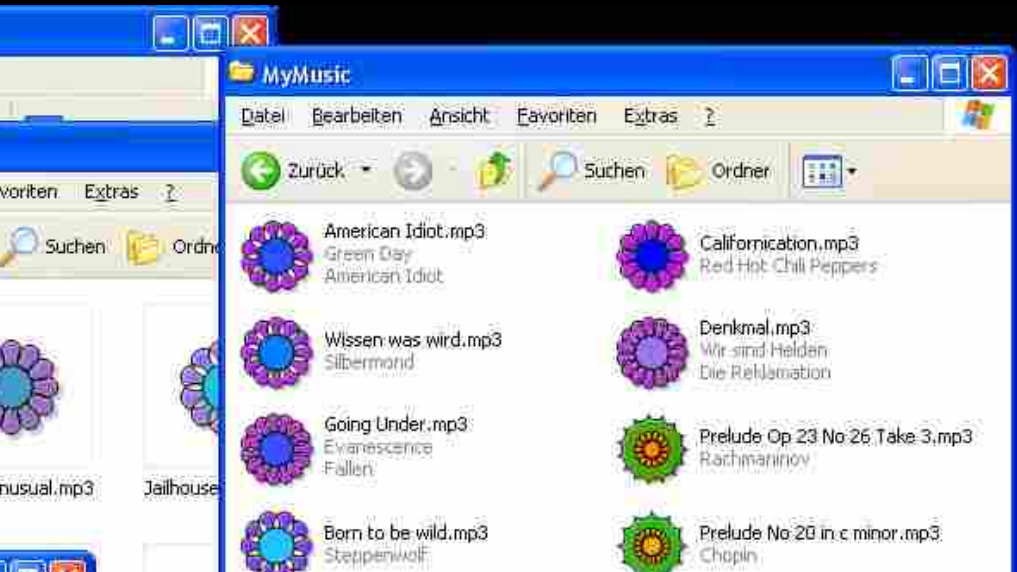

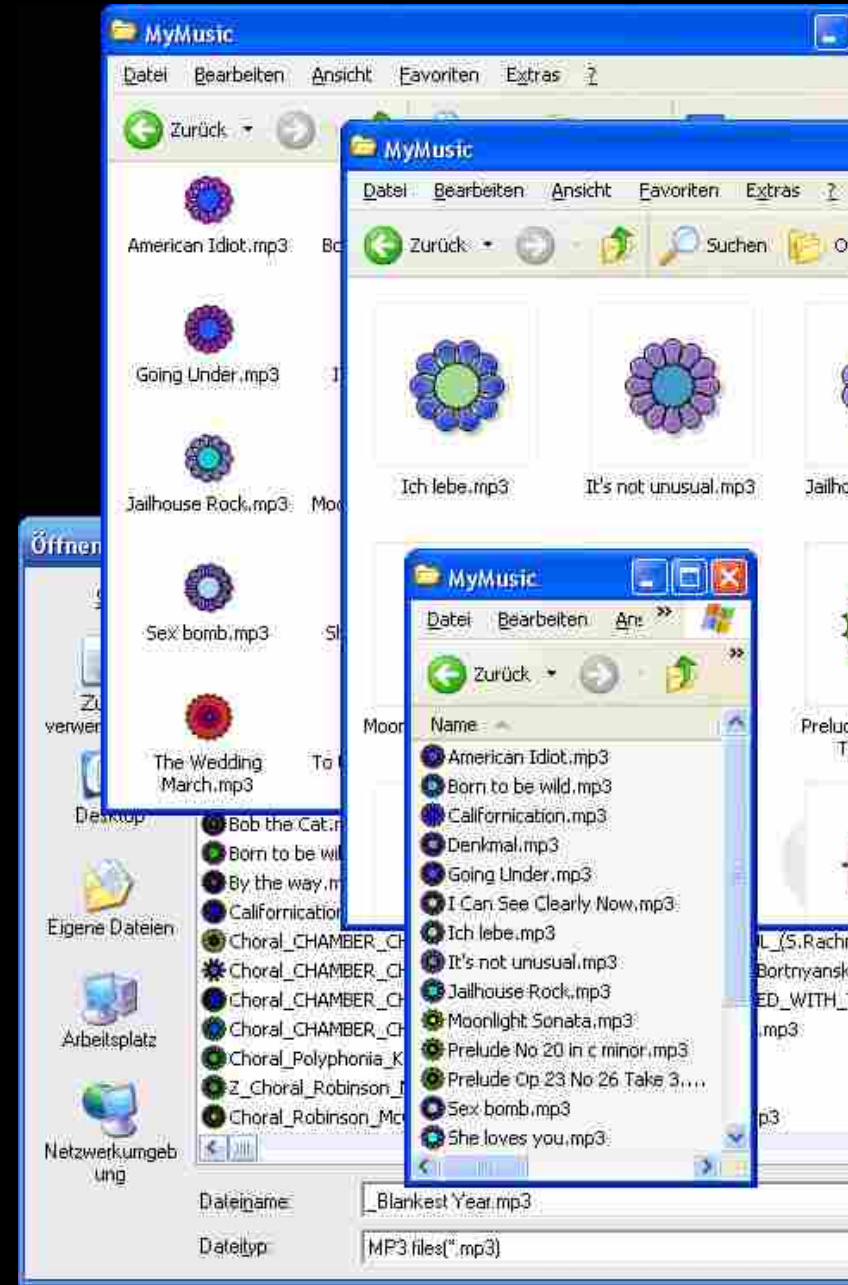

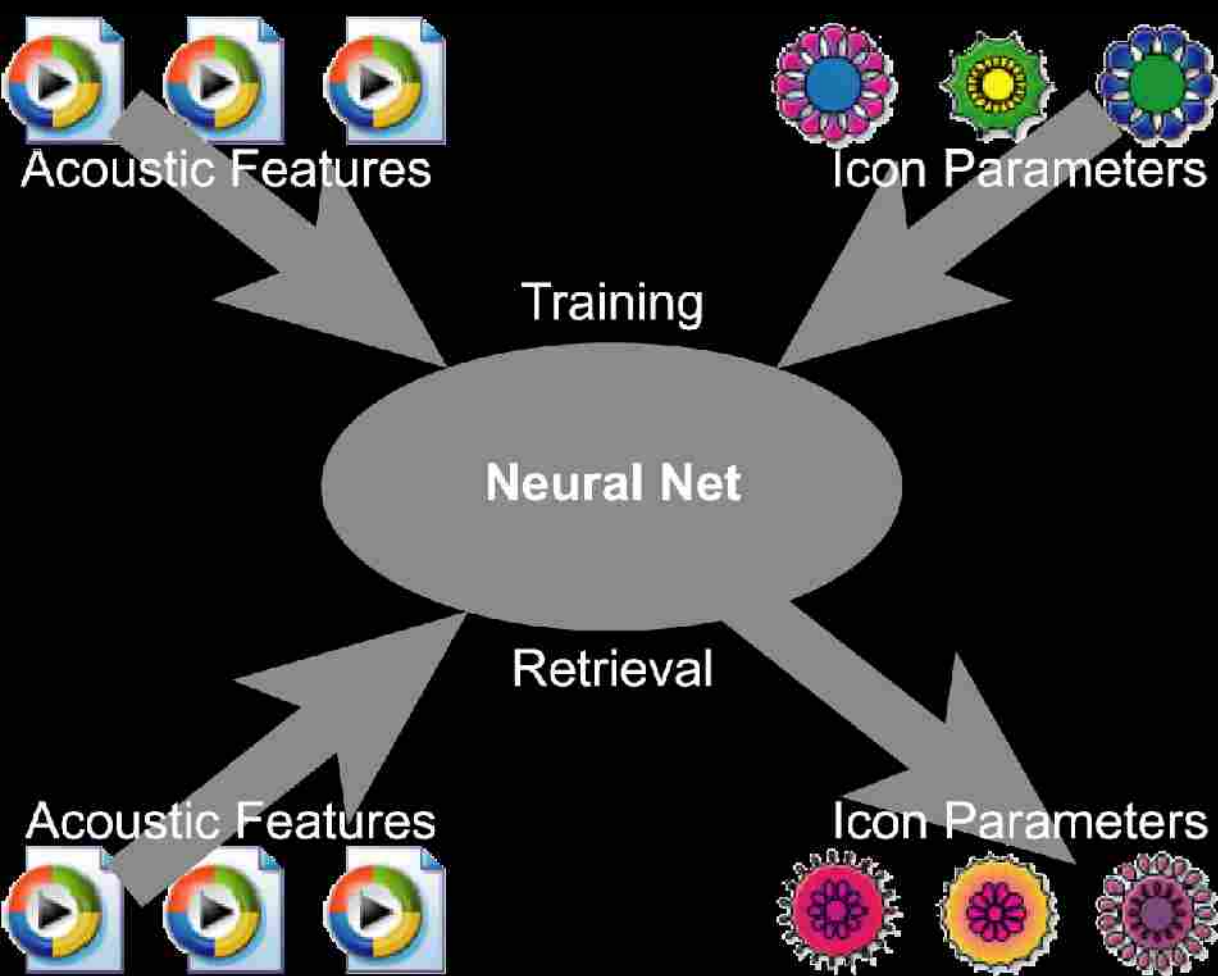

**Track
Identification**

Content Management

Music Icons: Procedural Glyphs for Audio Files

with Philipp Kolhoff and Jacqueline Preuß

Quick Browsing in Vast F/X Sound Collections

with Sebastian Heise and Michael Hlatky

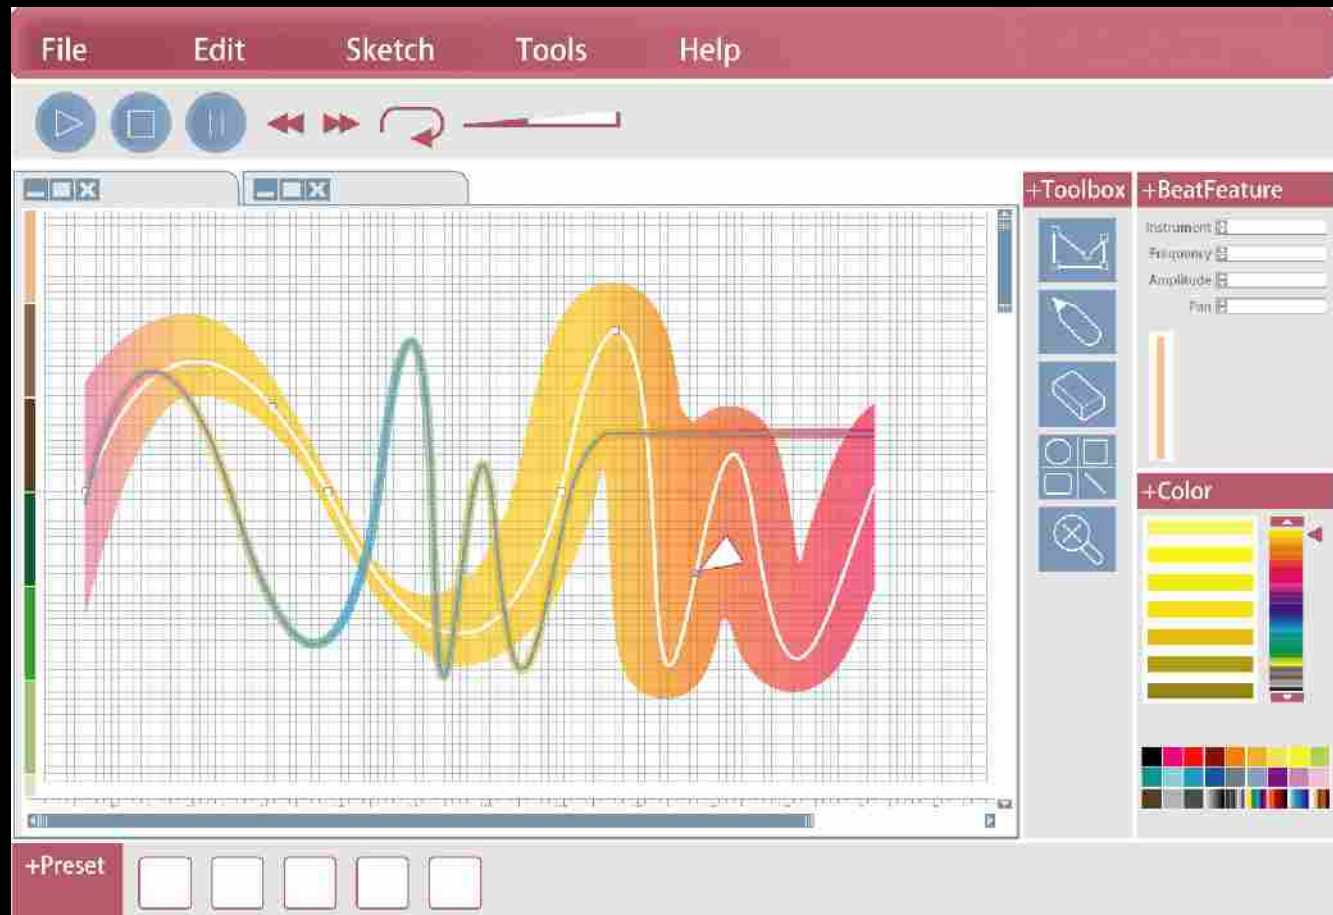

48,65Hz
26/101 streams

**Where to go
from here**

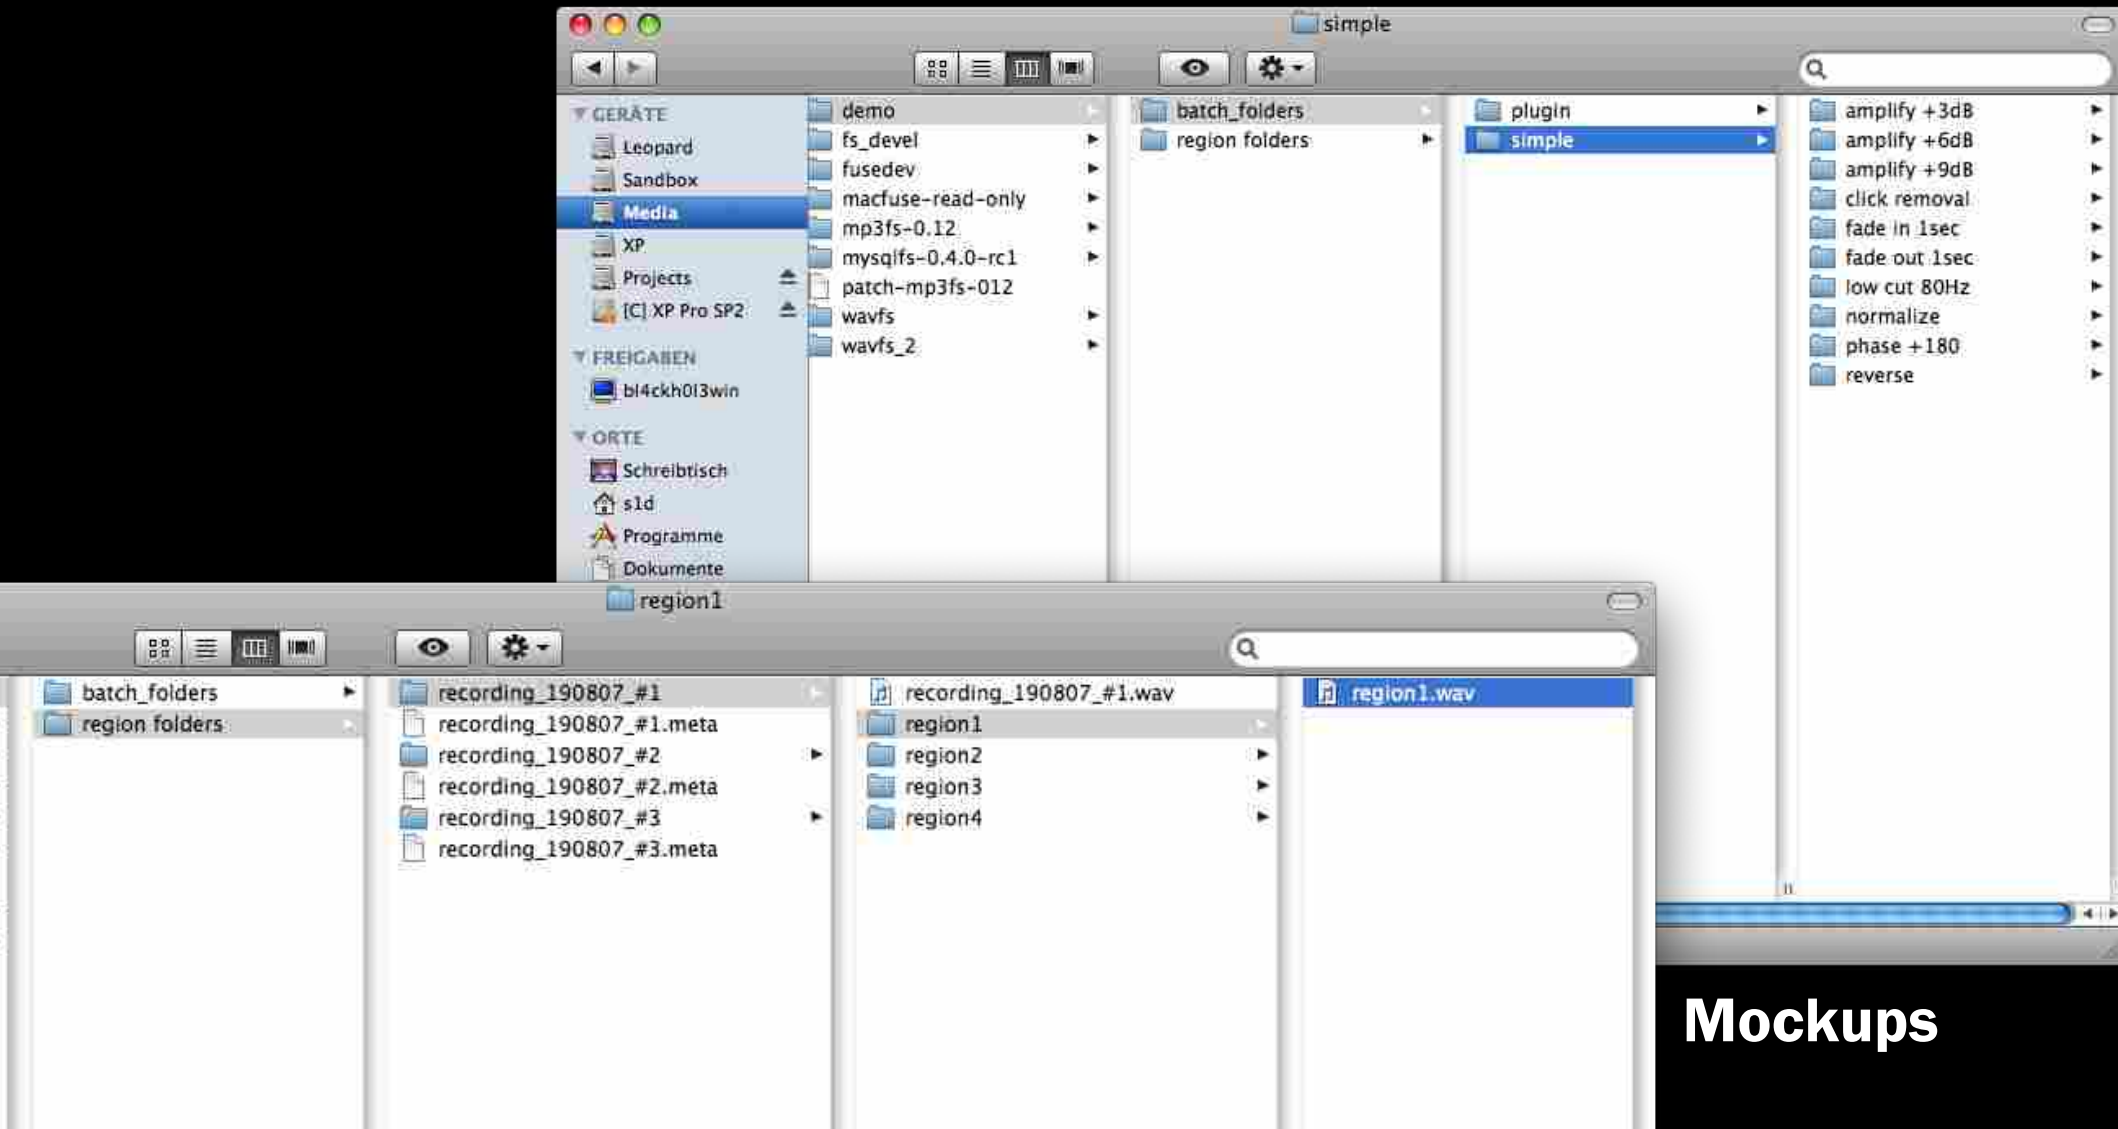

Sketching Sounds, Sketching Music

with the NoISE master's project group

FUSE for Audio Applications

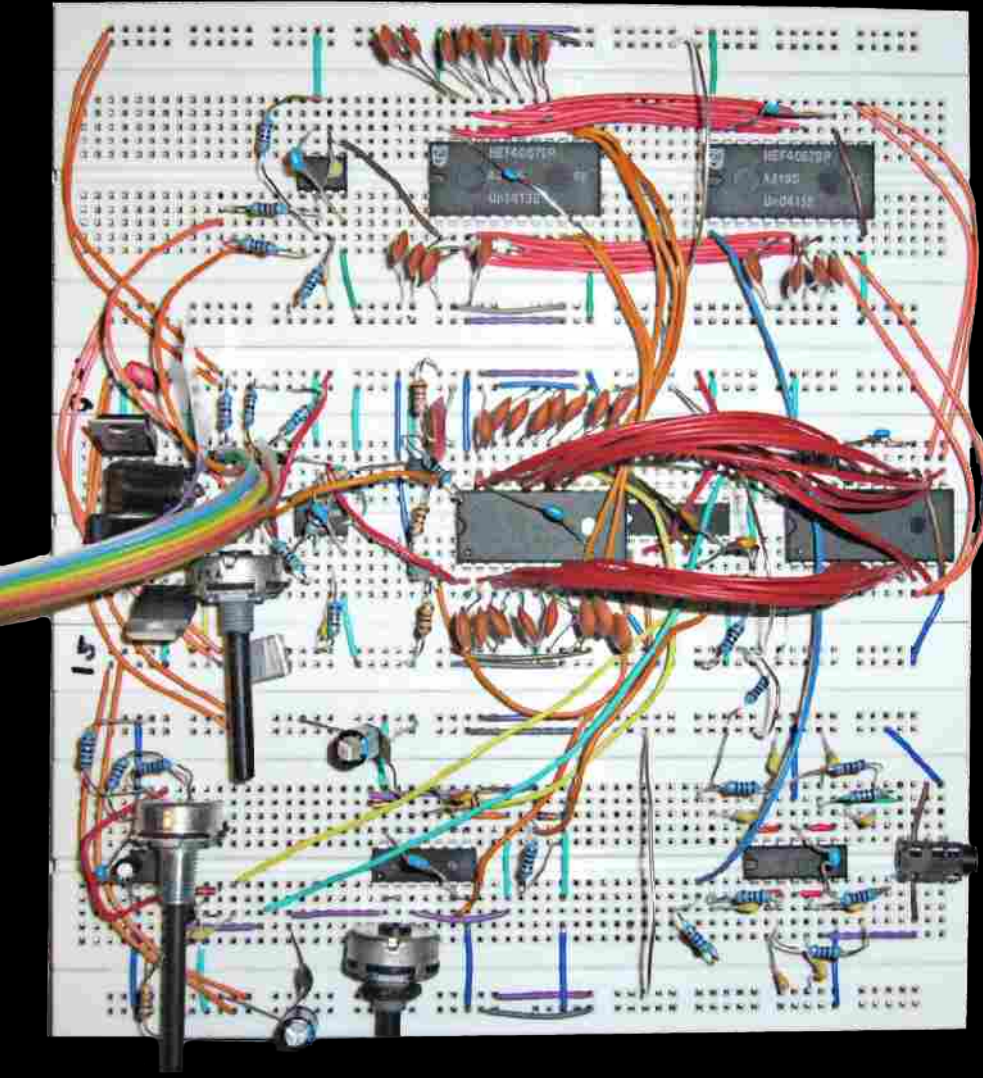

with Michael Hlatky and Sebastian Heise

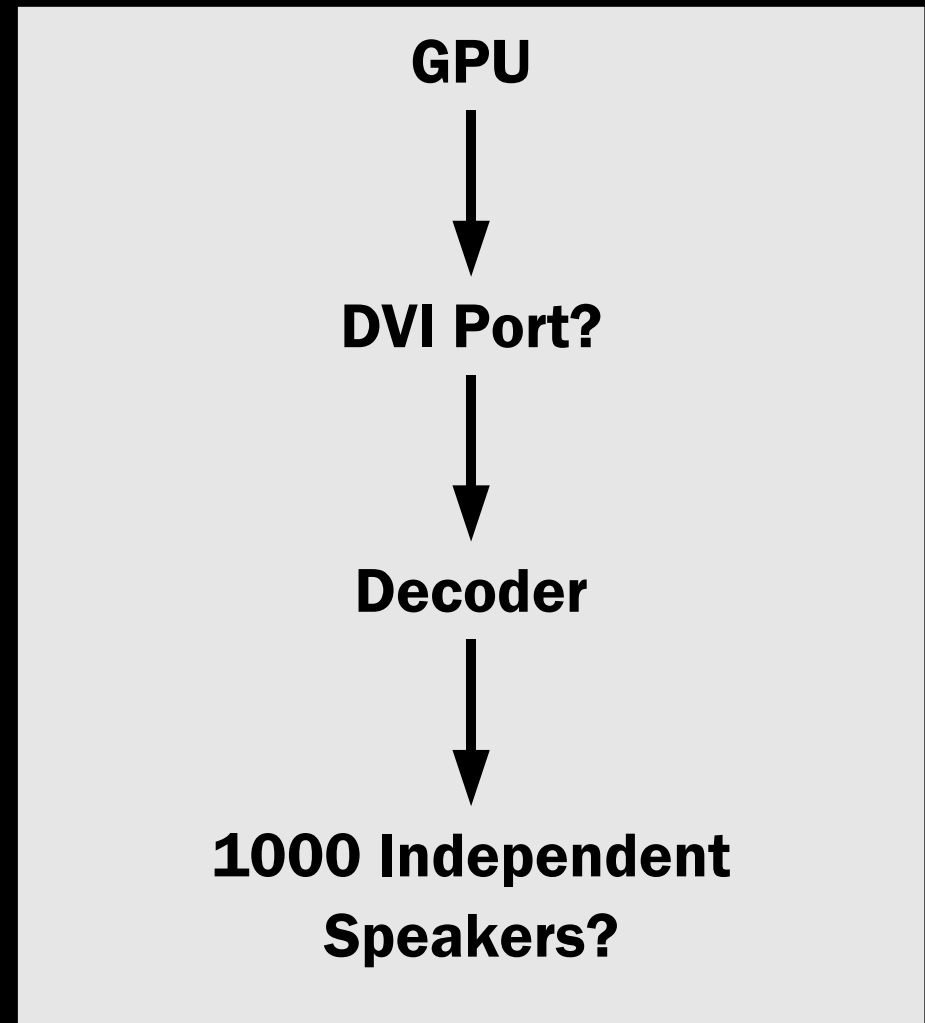

Mockups

GPU-based Audio Processing

VGA to Audio

DVI to Audio?

Reuniting Sound Control and Sound Generation

with ???

**Thanks for
your attention!**
